RHCSA EXAM: 100% Q

Q. How to crack root password

Answer:

Step 1: Restart the Computer.

Step 2: On the second line, press e to edit.

Step 3: Find the line that starts with "linux" and go to the end of it. Add rd.break there.

Step 4: Press Ctrl + X to boot.

Step 5: Once the system loads, type mount -o remount,rw /sysroot and press Enter.

Step 6: Type chroot /sysroot and press Enter.

Step 7: Type passwd root and press Enter to set a new root password.

Step 8: Type touch /.autorelabel and press Enter.

Step 9: Type exit twice to exit the chroot and reboot the system.

Step 10: Log in using the new root & password.

Step 11: Type startx to start the graphical interface (optional)(only for RHCSA Exam)
